

and any person subject to the possession limit may fish for summer flounder only from May 29 through September 11. This time period may be adjusted pursuant to the procedures in § 648.100.

[64 FR 48967, Sept. 9, 1999]

**§ 648.103 Minimum fish sizes.**

(a) The minimum size for summer flounder is 14 inches (35.6 cm) TL for all vessels issued a moratorium permit under § 648.4 (a)(3), except on board party and charter boats carrying passengers for hire or carrying more than three crew members, if a charter boat, or more than five crew members, if a party boat;

(b) The minimum size for summer flounder is 15 inches (38 cm) TL for all vessels that do not qualify for a moratorium permit, and party boats holding a moratorium permit if fishing with passengers for hire or carrying more than five crew members, or charter boats holding a moratorium permit if fishing with more than three crew members.

(c) The minimum sizes in this section apply to whole fish or to any part of a fish found in possession, e.g., fillets, except that party and charter vessels possessing valid state permits authorizing filleting at sea may possess fillets smaller than the size specified if all state requirements are met.

[61 FR 34968, July 3, 1996, as amended at 62 FR 10478, Mar. 7, 1997; 62 FR 37157, July 11, 1997; 62 FR 63875, Dec. 3, 1997; 63 FR 27868, May 21, 1998]

**§ 648.104 Gear restrictions.**

(a) *General.* (1) Otter trawlers whose owners are issued a summer flounder permit and that land or possess 100 or more lb (45.4 or more kg) of summer flounder from May 1 through October 31, or 200 lb or more (90.8 kg or more) of summer flounder from November 1 through April 30, per trip, must fish with nets that have a minimum mesh size of 5.5-inch (14.0-cm) diamond or 6.0-inch (15.2-cm) square mesh applied throughout the body, extension(s), and codend portion of the net.

(2) Mesh sizes are measured by a wedge-shaped gauge having a taper of 2 cm in 8 cm and a thickness of 2.3 mm

inserted into the meshes under a pressure or pull of 5 kg. The mesh size is the average of the measurement of any series of 20 consecutive meshes for nets having 75 or more meshes, and 10 consecutive meshes for nets having fewer than 75 meshes. The mesh in the regulated portion of the net is measured at least five meshes away from the lacings, running parallel to the long axis of the net.

(b) *Exemptions.* The minimum mesh-size requirements specified in paragraph (a)(1) of this section do not apply to:

(1) Vessels issued a summer flounder moratorium permit and fishing from November 1 through April 30 in the "exemption area," which is east of the line that follows 72°30.0' W. long. until it intersects the outer boundary of the EEZ. Vessels fishing with a summer flounder exemption permit shall not fish west of the line. Vessels issued a permit under § 648.4(a)(3)(iii) may transit the area west or south of the line, if the vessel's fishing gear is stowed in a manner prescribed under § 648.100(e), so that it is not "available for immediate use" outside the exempted area. The Regional Administrator may terminate this exemption if he/she determines, after a review of sea sampling data, that vessels fishing under the exemption are discarding more than 10 percent, by weight, of their entire catch of summer flounder per trip. If the Regional Administrator makes such a determination, he/she shall publish notification in the FEDERAL REGISTER terminating the exemption for the remainder of the exemption season.

(2) Vessels fishing with a two-seam otter trawl fly net with the following configuration, provided that no other nets or netting with mesh smaller than 5.5 inches (14.0 cm) are on board:

(i) The net has large mesh in the wings that measures 8 inches (20.3 cm) to 64 inches (162.6 cm).

(ii) The first body section (belly) of the net has 35 or more meshes that are at least 8 inches (20.3 cm).

(iii) The mesh decreases in size throughout the body of the net to 2 inches (5 cm) or smaller towards the terminus of the net.
